ISTRUZIONI PER INVASATURA

POTTING INSTRUCTIONS

Riempimento vaso

Riempire il vaso con 1/3 in altezza di argilla espansa, posizionare uno strato di tessuto drenante e completare il riempimento con terriccio alleggerito per giardini pensili fino a qualche cm dal bordo del contenitore interno. Attenzione, l'uso esclusivo di terra è sconsigliato perchè si compatta, non drena ed appesantisce oltre il consentito la struttura con rischio di danneggiare il vaso. L'argilla espansa svolge la funzione di riserva d'acqua, trattenendo l'umidità in eccesso e rilasciandola nel caso essa sia insufficiente.

Potting instructions

Fill the pot with 1/3 in height of expanded clay, put a draining cloth and complete filling with green roof lightweight soil, leaving 5 cm from the pot rim. Warning, the exclusive use of ordinary soil is not recommended, as it does not drain well and weigh down the structure beyond the permitted with risk of damaging the pot. Expanded clay has the function of water reservoir, holding excess wet and releasing it in case it is insufficient.

Portavaso

Infine i nostri vasi possono essere utilizzati come cachepot (portavaso). Sugeriamo l'utilizzo di un semplice vaso iniezione (plastica) con relativo sottovaso (opzionale).

Nel caso in cui il vaso sia provvisto di kit per il drenaggio dell'acqua, non rimuovere il tappino in PVC.

Cachepot

Finally, our pots can be used like cachepot. We suggest the use of an injection pot with relative saucer (optional).

In case that the drainage kit has already been mounted, don't remove the PVC stopper.

Interno

Procedere con l'invasatura senza forare il prodotto e, nel caso sia presente il kit di drenaggio dell'acqua, senza rimuovere il tappino in PVC dall'interno dell'alloggiamento

Indoor

Proceed with the potting without drilling the product and, if there is a water drainage kit, without removing the PVC stopper

Esterno

I nostri vasi possono anche essere utilizzati come dei vasi di terracotta, praticando con un comune trapano dei fori sul fondo del vaso (foratura Ø 6 mm circa). Per i vasi a doppia parete, nel caso sia presente il kit di drenaggio, va rimosso il tappo prima dell'invasatura, mentre se non sono muniti di kit di drenaggio, va forata sia la vasca interna che il fondo.

Outdoor

Our pots can also be used like terracotta pots, making holes with a common drill on the bottom of the pot (hole Ø 6 mm). If double-wall pots, have drainage kit, the cap must be removed before planting.

In case double-wall pots are not equipped with drainage kit, both the inner tank and the bottom must be drilled.

MOLESKIN FINISHING

Finitura artigianale sviluppata nei laboratori Serralunga.

Moleskin è una lavorazione artigianale che viene dalla storia di Serralunga e nello specifico dall'esperienza nella lavorazione del cuoio.

Con lo spirito di ricerca ed innovazione che da sempre caratterizza l'evoluzione dell'Azienda presentiamo con orgoglio alcuni nostri prodotti con un aspetto inedito alla vista ed inaspettato al tatto.

Una lavorazione che richiama i pregiati tessuti in fustagno, tessuti robusti, caldi e confortevoli, superfici da toccare e pettinare come una pelle di daino.

Con Moleskin la resistenza e la qualità dell'arredo outdoor di Serralunga si veste di una raffinata e nel contempo tradizionale eleganza.

Handcrafted finish developed in Serralunga laboratories.

Moleskin is a craftsmanship that comes from the history of Serralunga and specifically from the experience in leather processing.

With the spirit of research and innovation that has always characterized the evolution of the company, we proudly present some of our products with an unprecedented appearance at the sight and unexpected to the touch.

A process that recalls the precious moleskin fabrics, sturdy, warm and comfortable fabrics, surfaces to touch and comb like a deerskin.
